

Your World, Your Environment: Anticipation Guide

Mark each of these true or false:

1. Eventually humans will have to wear oxygen masks to survive the effects of air pollution.
 1. After either a manmade or natural disaster occurs, the earth is often able to heal itself.
2. It is the duty of humans to protect wildlife.
3. Since extinction is a natural process, it doesn't matter if humans cause the extinction of a certain species.
4. Overpopulation of people and animals is a crucial problem throughout our world.
5. Most Americans are not willing to be inconvenienced to help solve environmental issues.
6. Hunting is murder and should be banned.
7. In the last few years, the weather has gotten much worse due to man-made causes.
8. Pesticides and chemicals are harming the food we eat.

9. The government is responsible for ensuring its citizens have clean air and water.

1. Choose one of the statements above to write about below.

What do you think and why (restate the question)?

What questions do you have about this topic?

What would you want to know more about to make a more informed decision?

Explain your thoughts below:
